

EDS10ADSP-E4
SHALLOW COMPACT BASS ENCLOSURE
STREET SERIES ENCLOSURES

Small, compact and powerful, the STREET series 10" enclosure is designed to add powerful bass in a small footprint.

Built for performance while keeping a compact size, the STREET series enclosure features a shallow 10" subwoofer designed to deliver a precise and deep sound with accurate sound reproduction. The ultra-efficient Class D amplifier features a powerful DSP front end that gives the user full control over the 4-band parametric EQ, subsonic filter, low pass filter, phase and time delay via the smartphone app, that allows setup from the driver's seat. When bass is required and space is limited the STREET series compact enclosure is the perfect product for your bass enhancement.

Model	EDS10ADSP-E4
Driver	EDS10D2S
Dimensions (H x W x D)	144mm (5.7") x 320mm (12.6") x 457mm (18")
RMS Power	300 watts
Peak Power	900 watts
Impedance	2.2 Ohms
Frequency Response	30Hz - 250Hz
Configuration	2nd order acoustic suspension

BEST TECHNOLOGY - Unique to market DSP technology integrated into an active enclosure with an in-house developed smartphone-controlled APP.

POWERFUL DESIGN - Solid well well-structured MDF enclosure design with a carefully calculated internal air volume to allow for optimal performance and output. Whilst still keeping to a compact size.

BEST FEATURES -The APP and DSP for these enclosures give features not seen before. Full control of EQ, phasing, Q factors, and slopes is needed to give better bass control.

BEST PERFORMANCE - Featuring our powerful built-in amp, paired with DSP capability this compact box offers high levels of performance for the most demanding of users.

PAPER COMPOSITE

The subwoofer in the enclosure features a composite paper cone which is rigid and strong for accurate and powerful bass reproduction.

FOAM SURROUND

A lightweight foam surround allows us to create an efficient subwoofer. As a result of the suspension and surround the slim woofer has a higher linear excursion and a more accurate frequency response.

ACTIVE ENCLOSURE

Active Enclosure with built in amplifier for easier installation and wiring to a vehicle.

AUTO SENSE

For easy integration we have included auto-sense turn on, this means for OEM installations there is no need to find a remote turn on signal when installing into any vehicle.

HIGH LEVEL INPUT

When installing into an OEM headunit our Street series compact box has high level input, meaning this box can be installed easily without an aftermarket head-unit.

DSP TUNING APP

Our latest enclosure to feature our new DSP Tuning app which allows the end user to adjust all aspects of their enclosure from the palm of their hands.
