

EDBPB8-E5
FULL RANGE PRO AUDIO ENCLOSURE
DB SERIES ENCLOSURES

The DB Series Pro Box by EDGE is a standout product in the pro audio market, tailored specifically for delivering exceptional sound quality and volume, especially for those seeking high levels of ESQ (Extreme Sound Quality Level) within their vehicles. This all in one solution that includes 4 Pro Midrange drivers and 2 Pro bullet tweeters.

The box is equipped with four 8inch midrange drivers (EDBPRO8-E3) designed for efficiency and high output complemented with Two bullet tweeters to handle the high frequencies, ensuring a balanced and powerful audio experience. The Pro box is designed with a left and a right hand side for a stereo sound. Both sides are ported featuring terminals eitherside. The port is calculated to help deliver higher mid-bass response for a balanced sound. Made from solid MDF (Medium-Density Fiberboard), the enclosure is robust and features central bracing. This reduces resonance and vibration, contributing to clearer and cleaner sound playback.

Model	EDBPB8-E5
Driver	4X EDBPRO8 + 2xEDBPRO36T
Dimensions (H x W x D)	210mm (8.2") x 900mm (35.4") x 249mm (9.8")
RMS Power	860 watts
Peak Power	1720 watts
Impedance	Dual 2 Ω
Freq. Response	100Hz - 20kHz
Configuration	Full Range Pro Enclosure

BEST TECHNOLOGY - Featuring a flared Turbo Port for increased efficiency and increased bass response and the new EBP8 drivers with "Golf ball" design cone which increases strength and rigidity of the speaker cone and the added benefit of a small increase in cone area.

HIGH EFFICIENCY - The EDBPRO8-E3 drivers are noted for their efficiency, meaning they can produce a significant amount of sound without requiring excessive power.

BEST FEATURES - The enclosure features two sets of 2 x 2OHM spring terminals, allowing the enclosure to be ran in stereo for improved sound quality and staging

CRYSTAL CLEAR SOUND - The design and construction of the enclosure help minimize unwanted noise and resonance, ensuring that the sound remains clear and precise even at high volumes.

BASS ENHANCE

The EDGE full range pro enclosures feature a carefully tuned aero port for enhanced bass response.

WIDEBAND

This enclosure produces a Wideband full range sound output. Meaning you can enjoy listening to your music as the artist intended.

PRO AUDIO

The EDGE PRO boxes are designed with PRO audio in mind, these boxes are designed to be as loud as possible, whilst still remaining crystal clear.

PAPER COMPOSITE

Featuring the new EDBPRO8 speakers with the all new "Golf ball" design cone which increases rigidity and strength of the cone.

TI TWEETER

The PRO tweeters inside of the EDGE EDBPB8-E5 feature titanium diaphragms which allow the tweeters to keep up with the midrange by allowing the tweeters to play super clear and loud.

FOAM

Our edge DB series speakers feature a dual roll foam surround for increased excursion and bass response.
