

**Installation Instructions**  
 Review the vehicle and locate suitable places to mount the six LED tubes. Avoid locations that are hot, move, pinch points, the gas tank, and gas lines.

- 1) Side tubes get 4 clamps, front and rear tubes get 2 clamps. Try to evenly space the clamps, and do not position the clamp directly over an LED.
- 2) Starting at the controller connect the left extension (driver side) and route to the front left tube. **orientating the tube as shown.**
- 3) Mount the tube with supplies hardware, and secure the cable every 12 inches with the included zip-ties.
- 4) Continue to connect the tubes and extensions, matching the flag labels, and mounting the tubes as you go.
- 5) Repeat the process for the right circuit (passenger side).
- 6) **Connect controller**  
**Red:** Switched +12v  
**Black:** Chassis Ground  
**Green:** Driver turn signal (+12v)  
**Yellow:** Passenger turn signal (+12v)  
**White:** Brake wire (+12v)
- 7) Download app. Test functionality with remote and app. Test turn signals and brake functions.
