

AHD Rear-view camera compatible to VW Caddy 5 (SB) since MY 2021 with tail gate

VSA-VN61

Delivery content

Installation

Note: If the camera is powered by reverse gear lamp signal, we recommend to install a relay between the power supply of the reverse signal and the power supply of the camera, to ensure a stable and uninterrupted power supply and to avoid errors in the vehicle computer.

In case the isolation of the camera is harmed in the moisture section close to the camera, it is mandatory to repair the isolation. Otherwise the camera will inevitably become moist inside sooner or later.

Product features

- Mini ball rear-view camera NTSC (black)
- Incl. vehicle-specific housing for factory camera position above the licence plate
- Suitable for VW Caddy 5 (SB) since MY 2020 with tail gate
- System cable with throughput wire, e.g. for reverse signal
- Sensor type AHD 536 CMOS 1/4 Inch NTSC
- Resolution 720p, 1200 TV lines
- Frame rate up to 30fps
- Light sensitivity 0.2 Lux
- Dynamic range 56dB
- Aperture F1.2
- Angle H = 168°, V = 118°, D = 188°
- Guide-lines can be switched off
- Protection class IP69K
- Suitable for permanent operation (connection to ACC)
- Operating voltage **+12/24V DC (6 ~ 28V)**
- Operating voltage camera **+3,3V DC**
- Current consumption 50mA
- Video connection RCA male connector
- System cable of camera 4pin 3V
- Diameter of camera connector 5mm
- Total cable length 8.70m
- Operating temperature range -30°C to +75°C
- Dimension (camera with housing) WxDxH 50x60x35mm
