

PIONEER SDA-RP100 | ANDROID APPS COMPATIBILITY

The Pioneer projector DA-RP100 does not support the Google Play Store, but accesses an alternative App Store for Android Apps.

This store is perfectly legit. If you get a message "This product has no certification, please contact the manufacturer", you can simply ignore the message.

In order to skip this message, you can try to:

- Press the "Back" button (on the supplied remote control) once or twice*.
- If the app indicates "Requires Mouse" on the install screen, please connect a USB Mouse or Bluetooth Mouse and then select play.
- Reinstall an older version of the app from "OTHER VERSIONS" on the app install screen.

Please contact our [customer support](#) if you would require any assistance.

*Depending on the installed app.
